Not reported	61	1.6	5,760	3	30,500	(3)	

This group includes the nationwide steel stoppage. In addition to the unions' demand for wage and/or fringe benefit increases, the issues in the steel strike also included company proposals for changes in working rules.

2 Issues such as retroactivity, holidays, vacations, job classification, piece rates, incentive standards, or other related matters unaccompanied by proposals to effect general changes in wage rates are included in this category. Slightly less than a third of the stoppages in this group occurred over piece rates or incentive standards.

3 Less than 0.05 percent.

NOTE: Because of rounding, sums of individual items may not equal totals.

Includes disputes between unions of different affiliation such as those between unions affiliated with the AFL-CIO and nonaffiliates.

Excludes disputes between unions of the same affiliation.
Includes disputes within a union over the administration of union affairs or regulations.

		ļ			
		L	l		

Man-days of employment in the primary metal industries group during the steel strike have been computed on the basis of average employment throughout the affected months, rather than on the usual basis of employment in the pay period ending nearest the fifteenth of each month. In July, employment in primary metals was 1,266,000 in the pay period ending the fifteenth, and was presumed to be 778,000 during the second half of the month. In November, employment was 1,196,000 in the pay period ending nearest the fifteenth, and was presumed to hold at this level in the last 3 weeks of the month, but was reduced by 476,000 in the first week of the month, during which time the steel strike was in progress.

NOTE: Because of rounding, sums of individual items may not equal totals.

If the percentage of time lost were calculated on the basis of ratio of time lost to time worked plus time lost, the percentages would have been 12.12 in primary metal industries and 1.33 in the manufacturing group.

Stoppages extending into 2 or more industry groups have been counted in each industry group affected; workers involved and man-days idle were allocated to the respective groups.

Excludes government.

⁴ Not available.
